Closed User Group Importer

Specification and Documentation
Closed user group importer specification

Smile provides the ability to import a Comma Separated Values (CSV) file to add closed user group members into existing closed user group(s).

File format

A closed user group importer file is a CSV formatted document containing two record types:

- **header**—contains the column names for the entry records
- **entry**— contains the actual import data of interest, one entry for each closed user group member

Commas separating unused columns at the end of a line may not be omitted.

Header

The first line is a single header containing column names for the entries, separated by commas. The importer will display an error if the header line is not included in the CSV.

```
"CUG Name","Phone Number","Valid From","Valid To"
```

Entry

An entry contains the actual import data of interest. One entry for each closed user group member.

Table 1: Entry record field definition

Col	Field name	Data type	Description	Required?
0	CUG Name	Text	The existing closed user group name.	Yes
1	Phone Number	Text	The identifier of each member in the group.	Yes
2	Valid From	Timestamp ISO Standard	Date and time that the member is valid from. Formatted YYYY-MM-DDThh:mm:ss+Z. For example: 2016-01-01T00:00:00+10:00.	No
3	Valid To	Timestamp ISO Standard	Date and time that the member is valid to. Formatted YYYY-MM-DDThh:mm:ss+Z. For example: 2016-01-01T00:00:00+10:00.	No

inomial

Example file

```
"CUG Name","Phone Number","Valid From","Valid To"
Test CUG 1,61396630024,,
Test CUG 1,61396630025,,
Test CUG 2,0461112222,
↳ 2016-07-01T00:00:00+1000,2016-07-31T23:59:59+1000
```
